CONTENTS OF VOLUME 26

NUMBER 1

The MinMax information measure
J. N. KAPUR, G. BACIU and H. K. KESAVAN 1

An error-learning neural network for the tuning of robot dynamic models
A. Y. ZOMAYA 13

A pole placement adaptive control of a rapid thermal processor
S. MORALES, B. DAHHOU, G. ROUX and J. P. BABARY 33

Design of robust adaptive regulators for large-scale systems
M. KAMOUN 47

A new set of pulse-width modulated generalized block pulse functions (PWM-GBPF) and its application to cross-/auto-correlation of time-varying functions
A. DEB, G. SARKAR, S. K. SEN and A. K. DATTA 65

Analysis of linear time-invariant time-delay systems via orthogonal functions
B. M. MOHAN and K. B. DATTA 91

Time delay compensation: the PIP philosophy
P. DANIEL and C. S. COX 113

A near-decoupling design of multivariable feedback systems with the V-canonical compensator
CHING-CHENG CHENG, TE-PING TSAI and TE-SHING WANG 135

Matricial gradient for the least-squares residual and its application to optimal model fitting
A. WEINMANN 147

Multivariable optimal control for on-demand operation of irrigation canals
S. SAWADOGO, P. O. MALATERRE and P. KOSUTH 161

NUMBER 2

Publisher's Announcement 179

An inverse dynamic-based dynamic programming method for optimal point-to-point trajectory planning of robotic manipulators
V. YEN 181

Adaptive fuzzy modelling and identification with its applications
YAOCHU JIN, JINGPING JIANG and JING ZHU 197

Optimal (s, S) policy for an inventory system when the demand can be partially satisfied
K. L. MAK and K. K. LAI 213

Investigating the brachistochrone with a multistage Monte Carlo method
D. S. SZARKOWICZ 233

Stabilization of input delay constrained systems with delay dependence
PIN-LIN LIU 245

Performance robustness analysis of Kalman filter for linear discrete-time systems under plant and noise uncertainty
X. F. ZHANG, A. W. HEEMINK and J. C. H. VAN EIJKEREN 257

Internal model control with enhanced robustness
H. A. ZHU, G. S. HONG, C. L. TEO and A. N. POO 277

Spectral characterization and pole assignment for positive linear discrete-time systems
V. G. RUMCHEV and D. J. G. JAMES 295

Finite-dimensional VS-MRAC of distributed parameter systems with boundary inputs
MOTOFUMI SASAKI, YOSHIKAZU HAYAKAWA, SEIZO FUJII, KUNIO KOIZUMI and TOSHIHIRO IWAKI 313
Guaranteed stabilization of interconnected discrete-time uncertain systems
M. S. MAHMOUD 337
Dynamic controllers for systems with actuators
M. S. MAHMOUD 359
A multiseed non-hierarchical clustering technique for data analysis
D. CHAUDHURI and B. B. CHAUDHURI 375
Decomposition for augmented forms of large-scale systems
D. S. EVANGELATOS 387
Allocation of resources in project management
C. H. SCOTT and T. R. JEFFERSON 413
Output feedback stabilization of a class of uncertain internally delayed systems
NINGSU LUO and M. DE LA SEN 421
Kalman–Bucy filtering for stochastic Volterra models
M. DE LA SEN and C. F. ALASTRUEY 435
On the robustness of stability for uncertain time-delay systems
CHIEN-HUA LEE, TZUU-HSENG S. LI and FAN-CHU KUNG 457

NUMBER 3

Constructing a sliding regime for load–frequency control of an interconnected hydrothermal power system
SHUN-YUAN WANG, CHIN-MING HONG, WEI-TZEN YANG and CHUN-CHANG LIU 467
Stability concepts for general continuous-time implicit systems: definitions, Hautus tests and Lyapunov criteria
T. GEERTS 481
A control algorithm for the two-dimensional glucoregulatory system
S. M. EL-SHAL and N. M. EL-RABAIE 499
A control design procedure for plants with random initial conditions and constraints on the mean square actuator rates
C. FRANGOS and Y. YAVIN 515
Adaptive feedback control for unevenly sampled systems
AI PING WANG and HONG WANG 525
Resonance analysis of nonlinear systems with compound critical points
S. SHIQI WANG and KONCAY HUSEYIN 543
Guaranteed cost stabilization for a class of uncertain discrete-time systems
K. H. KIENITZ 555
On the oscillatory convergence of solutions of a neutral delay diffusion equation
K. GOPALSAMY, XUE-ZHONG HE and DA-QING SUN 563
An application of sliding mode control to the determination of system orders
H. SIRA-RAMÍREZ, P. LOPEZ and A. S. NOURI 577
Stability and convergence of large-scale stochastic approximation procedures
G. S. LADDE and B. A. LAWRENCE 595
Adaptive PID control of systems with unknown time delay
A. BESHARATI RAD and WAI LUN LO 619
A new approach to auto-tuning of PID controllers
K. M. TSANG and A. BESHARATI RAD 639
Estimation of parameters of failure distributions with fuzzy data
K. P. SOMAN and K. B. MISRA 659
Ranking multicriteria fuzzy alternatives in the decision-maker's preference subspace
HUISHEN LI and F. CHOOBINEH 671

A generalized sequential preventive maintenance policy for repairable systems with general random minimal repair costs
SHEY-HUEI SHEU and CHING-TIEN LIOU 681
Deterministic control of uncertain feedback systems with time-delay and series nonlinearities
JINN-SHING CHENG and JER-GUANG HSIEH 691
Stochastic sensitivity analysis method for neural network learning
MASATO KODA 703
Correspondence
Comments on 'Robust stabilization of uncertain linear dynamical systems'
D. Q. CAO 713
Design of a new accommodation filter for failure detection and identification
JAE-HYEOK LEE and ZEUNGNAM BIEN 717

NUMBER 4

A method for biomedical system modelling and physiological parameter estimation using indirectly measured input functions
DAGAN FENG and XINMIN WANG 723
A parametric transfer matrix approach to fault-identification filter design and threshold selection
SHAO-KUNG CHANG, PAU-LO HSU and KEN-LI LIN 741
A system-theoretic property of serial production lines: improvability
D. JACOBS and S. M. MEERKOV 755
Calculation of Markov parameters from the transfer function matrix of MIMO systems
N. F. AL-MUTHAIRI and S. BINGULAC 787
Output deadbeat control using state feedback of discrete-time multivariable systems
J. C. ENGWERDA 799
The least-squares Padé method for model simplification of multivariable systems
L. A. AGUIRRE and E. M. A. M. MENDES 819
A new algorithm for decentralized adaptive control
GANG FENG and Y. A. JIANG 841
Design of a robust estimator for nonlinear kinetic modelling
LI-YANG TAN and T. W. WEBER 851
A series of discrete-time models of a continuous-time system based on fluency signal approximation
KAZUO TORAICHI, BAMBANG SRIDADI and HIROSHI INABA 871
Control and state observations of periodic linear multimodal systems
JING-SIN LIU and YUNG-SHAN CHOU 883
Computation of system gramians and balanced realizations using MapleV
A. B. OGUNYE and A. PENLIDIS 899
A control synthesis methodology for uncertain plants with random initial conditions
C. FRANGOS and Y. YAVIN 927
Fast algorithms for decoding the (23, 12) binary Golay code with four-error-correcting capability
E. H. LU, H. P. WUU, Y. C. CHENG and P. C. LU 937
Absolute controllability of predicates in discrete event systems
YONG-HUA LI 947
Robust gain margin for a cascade of uncertain links
O. N. KISELEV and B. T. POLYAK 965

Estimation of surface orientation from directional derivatives of shading image
HIDEKAZU TANAKA, YUJI IWAHORI and NAOHIRO ISHII 975
A general and easy computational method for functions of fuzzy numbers
DON-LIN MON and CHING-HSUE CHENG 983
Matrices computation of an unknown-input observer
G. SCHREIER, B. GADDOUNA and J. RAGOT 991
New results for the stability of uncertain time-delay systems
CHIEN-HUA LEE, TZUU-HSENG S. LI and FAN-CHU KUNG 999

NUMBER 5

Fuzzy control of a manipulator using an actuator and multibrakes
YOSHIHARU OHTANI and TOSHIO YOSHIMURA 1005
Robust adaptive control for robot manipulators
GANG FENG and R. L. REN 1017
Two-time-scale discrete-time modelling and decomposition of synchronous machines
G. K. CHOUDHARY, N. P. SINGH and Y. P. SINGH 1029
Some models for developmental systems—Part XIV: Parallelism with applications to developmental systems and to queueing systems
P. VIDAL, J.-C. GILLE, S. WĘGRZYN and T. CZACHÓRSKI 1041
On detection of lines using search techniques and list processing
K. N. V. L. N. KOUNDINYA and B. CHANDA 1053
Steady-state identification for large-scale industrial process by means of dynamic models
Q. X. CHEN and B. W. WAN 1079
Time-varying continuous nonlinear systems: uniform asymptotic stability
L. T. GRUCJIĆ 1103
The structural relationship between financial ratios and capital asset pricing
R. ÖSTERMARK and J. AALTONEN 1129
Compensation of uncertain continuous systems by using the internal model control principle
M. DE LA SEN and I. SAGASTABEITIA 1153
Central banking in a transitory economy: an adaptive control model for India
D. R. BASU 1181
Multilater recurrent neural networks for on-line synthesis of asymptotic state estimators for linear dynamic systems
JUN WANG and GUANG WU 1205
Design and analysis of a fuzzy logic controller
CHENG-LIANG CHEN and FONG-CHIH KUO 1223
Controller design for continuous systems with variance and circular pole constraints
WANG ZIDONG, CHEN XUEMIN and GUO ZHI 1249

NUMBER 6

Optimal power system stabilizer
H. M. SOLIMAN and K. M. AROUDI 1257
A subsystem design approach to continuous-time performance of decentralized multirate sampled-data systems
HIROSHI ITO, HIROMITSU OHMORI and AKIRA SANO 1263
On the stability of strategies in competitive systems
S. OLAFSSON 1289
Sensitivity analysis revisited: changing input–output coefficients of a basic activity
F. DUBEAU 1313

Using a functional integration matrix to solve time-varying bilinear systems
CHING-YU YANG 1321
Towards a portable and efficient environment for parallel computing
J. LYU, A. GUNASEKARAN and V. KACHITVICHYANUKUL 1333
Stability problem of a periodically varying system
M. F. CHOUIKHA and A. JENDOUBI 1343

NUMBER 7

A fuzzy rule-based approach to achieve visual comfort conditions
A. I. DOUNIS, D. E. MANOLAKIS and A. ARGIRIOU 1349
Probabilistic evaluation of control system robustness
R. F. STENGEL, L. R. RAY and C. L. MARRISON 1363
A reformulation of receding-horizon predictive control
TAE-WOONG YOON and D. W. CLARKE 1383
A variance frontier model of market volatility: an empirical application
J. K. SENGUPTA 1401
Modelling sequential circuits with cellular automata
D. ALOVISIO, S. CIANCHINI, E. MACII and M. PONCINO 1415
On identification of parallel block-cascade nonlinear models
H. E. EMARA-SHABAIK, K. A. F. MOUSTAFA and J. H. S. TALAQ 1429
Graph models for PLA folding problems
E. MACII and TARA WOLF 1439

NUMBER 8

Spy-sensors and detection
A. EL JAI and L. AFIFI 1447
A Kalman filter algorithm using a moving window with applications
ZHENG-OU WANG and JIANPING ZHANG 1465
Position and force tracking control of rigid-link electrically driven robots actuated by switched reluctance motors
M. D. LEVINER and D. M. DAWSON 1479
A dynamic view of Farrell efficiency
J. K. SENGUPTA 1501
Total cumulative work until failure of a system modelled by a finite semi-Markov process
A. CSENKI 1511
School of pansystems analysis: its birth, growth and achievements—an overall picture and first glance at its magnificent research
YI LIN 1527

NUMBER 9

Robust control of robot manipulators with fast load adaptation
Q.-G. WANG, T. H. LEE and W. K. TAN 1539
Some properties of Pareto efficiency under the framework of data envelopment analysis
CHIANG KAO 1549
Analyses of sensitivity and competition of an EOQ model
CHENG-KANG CHEN, K. JOHNSON and K. JO MIN 1557
State estimation of dynamical systems with nonlinearities by using proportional-integral observer
D SÖFFKER, TIE-JUN YU and P. C. MÜLLER 1569

Robust performance analysis for linear continuous/discrete time systems with linear dependent and time-varying perturbations
CHIEH-LI CHEN and SHYI-KAE YANG 1583

The dynamic lot-sizing problem with variable unit costs
CHING-JONG LIAO and TSUNG-SHIN HSU 1593

Parameter bounds for root clustering of uncertain matrices
I. CHOUAIB and B. PRADIN 1601

The economic impact of a transportation bottleneck: an integrated input–output and linear programming approach
TO-FAR WANG and R. E. MILLER 1617

H_∞-control and filtering with initial uncertainty for time-varying systems
AKIRA ICHIKAWA 1633

A control-theoretic view of diagonal preconditioners
E. KASZKUREWICZ, A. BHAYA and P. R. V. RAMOS 1659

Sensitivity analysis of machine interference in manufacturing systems
M. S. MAHMOUD and A. A. BAHNASAWI 1673

Using decomposition approach to estimate the stable regions of variable structure control for linear time-invariant system with bounded control variables
JUN LIU 1687

On the time-series stability of industry-relative financial ratio patterns
T. MARTIKAINEN, K. PUHALAINEN, P. YLI-OLLI and A. GUNASEKARAN 1701

The impact of OPT and TPM on the economic production quantity
A. GUNASEKARAN, J. LYU, L. VIRTANEN and P. YLI-OLLI 1715

A new method for estimating complex exponentials to fit signals using samples of the signal and its derivative (or integral)
M. H. EL-SHAFEY 1729

Effect of colcemid on CHO cells progression: computer simulation
S. M. EL-ASSOULI, S. Y. ABED, O. S. OZKUL and M. M. ALIDRISI..... 1739

The stability of linear partial differential systems with infinite delay
ZHANG YI and Y. ZHANG 1747

Correspondence

Determining economic maintenance frequency of a transport fleet
R. VAN EGMOND, R. DEKKAR and R. E. WILDEMAN 1755

NUMBER 10

Stability and robustness analysis of boundary control of a flexible space structure
P. LI, S. S. LIM, G. VUKOVICH and N. U. AHMED 1759

Control of interconnected power systems via linear programming and decentralized optimization techniques
P. FESSAS and C. PARISSES 1777

Autoregressive and adaptive estimation with an application to hurricane track prediction
N. D. RAMIREZ-BELTRAN 1791

Periodic controllers for finite-dimensional linear time-invariant systems
M. J. ER 1813

Identification of systems from non-uniformly sampled data
K. M. TSANG and S. A. BILLINGS 1823

Robust optimal pole-placement in a vertical strip and disturbance rejection
SHENG-GUO WANG, LEANG S. SHIEH and J. W. SUNKEL 1839

Digital control of Pritchard–Salamon systems
F. D. Barb and W. L. De Koning 1855

Integral inequalities of Gronwall type for piecewise continuous functions and applications
D. D. Bainov and S. G. Hristova 1875

Open-loop non-iterative co-ordination in a multilevel system
K. P. Stoilova and T. A. Stoilov 1887

Robust control of multivariable critical systems
G. P. Liu, H. Unbehauen and R. J. Patton 1907

Haploid and diploid algorithms, a new approach for global optimization: compared performances
C. Fonteix, F. Bicking, E. Perrin and I. Marc 1919

Output feedback control of non-affine MIMO systems
P. Podsiadlo and C. J. Goh 1935

Robust stability bounds for sampled-data systems
J. Ezzine 1951

Stability robustness of linear discrete-time systems under time-varying perturbations
Jianjun Cui and A. Eltimsahy 1967

Lyapunov stability theory and robust control of uncertain descriptor systems
Hansheng Wu and Koichi Mizukami 1981

Decentralized variable-structure model-reference adaptive control of linear time-varying large-scale systems with bounded disturbances
Chiang-Cheng Chiang 1993

Passivity-driven fuzzy logic control of a multidegree-of-freedom reaction compensating system
Yueh-Jaw Lin and Yi-Qing Lu 2005

Kalman filtering with unknown inputs via optimal state estimation of singular systems
M. Darouach, M. Zasadzinski, A. Bassong Onana and S. Nowakowski 2015

Common-cause failure analysis of a k-out-of-n:G system with non-repairable units
B. S. Dhillon and O. C. Anude 2029

NUMBER 11

H_2/H_∞ robust control design for a generalized control structure and flight control application
M. J. Grimble 2043

Matrix formulae for open and closed-loop approximate model matching in frequency domain
L. A. Aguirre 2069

A comparison of fuzzy neural networks for the generation of daily average and peak load profiles
P. K. Dash, A. C. Leiw and S. Rahman 2091

Computer recognition of printed Bangla script
U. Pal and B. B. Chaudhuri 2107

The boundary stabilization of a linearized self-excited wave equation
G. R. Sarhangi, M. Najafi and H. Wang 2125

Implementation of state-feedback control law for singular systems via an input–output feedback structure
J. S. H. Tsai, C. P. Fan and L. S. Shieh 2139

Adaptive robust control of nonlinear uncertain systems
ZHONG-HUA LI, TIAN-YOU CHAI, CHEONG-BOON SOH and CHANGYUN WEN 2159

Robustness and transient performance of adaptive decoupler for a class of multivariable systems
WEN YU and T. Y. CHAI 2177

A controller design method for nonlinear systems via a staged-transformation technique
JIAN CHU and HONGYE SU 2187

Task scheduling with precedence constraints to minimize the total completion time
JOU-MING CHANG and CHIUN-CHIEH HSU 2203

Towards an algebraic combinatoric description of closed systems
S. Z. STEFANOV 2219

Stabilization of uncertain large-scale delay differential control systems
A. S. C. SINHA 2227

On disturbance localization in singular systems with direct feedthrough
LIAN-SHENG TAN 2235

Price co-ordination for a resource allocation problem in a large-scale system
R. GESSING and Z. DUDA 2245

New management policies to improve the effectiveness of multi-station service organizations
D. H. HAMMOND, S. M. CROW and S. J. HARTMAN 2255

Announcement 2261

NUMBER 12

An exponentially convergent adaptive sliding mode control of robot manipulators
V. PARRA-VEGA and SUGURU ARIMOTO 2263

On explicit and implicit solutions of fuzzy linear equations
M. KWIESIELEWICZ 2277

On the generic structure at infinity within the transfer matrix form
A. BELMEHDI 2287

A simulation study on schooling behaviour of fish in a water tank
M. A. DOUSTARI and N. SANNOMIYA 2295

A robust approach for identification of linear lumped systems using Hermite polynomials
A. T. MATHEW and A. N. JHA 2309

On characterizing the production possibility set for the CCR ratio model in DEA
J. H. DULÁ and N. VENUGOPAL 2319

State space modelling and spectral analysis of cointegrated vector processes (evidence from the U.S. and Scandinavian economies)
R. ÖSTERMARK and MASANAO AOKI 2327

A stochastic hunting model involving two countries
M. LEFEBVRE and M. MAZIGH 2355

Recurrent neural networks to synthesize linear control systems via pole placement
JUN WANG and GUANG WU 2369

Finite-dimensional compensator for a class of uncertain distributed parameter systems
DONG YUE, YONGQING LIU and SHIFAN XU 2383

Lot sizing models for deteriorating items with time-dependent demand
M. A. HARIGA 2391

Approximate balanced-truncation model reduction for weakly coupled discrete-time systems
U. M. AL-SAGGAF and M. A. UBAID 2403
On the transient behaviour of a merge production system
M. N. GOPALAN and U. D. KUMAR 2417
Solution convexity of a system of linear interval equations
YOSHIHIRO TANAKA 2429
Stochastic analysis of a priority unit standby system with repair machine failure
R. GUPTA and A. CHAUDHARY 2435
A note on robustness bounds for large-scale time-delay systems
G. M. SCHOEN and H. P. GEERING 2441
Correspondence
Comment on 'Robust stabilization of uncertain linear dynamical systems'
GUANG-DA HU and GUANG-DI HU 2445
